Total Tyre Control® App

The TTC App has been developed to take advantage of today's advanced mobile technology. It has been designed to work on Apple IOS and Android devices including smart phones, tablets and iPads.

What can I do with the TTC App?

- Vehicle audits.
- Scheduled maintenance.
- Full vehicle and tyre/rim search.
- Display graphical reports.

How does it work with TTC Web?

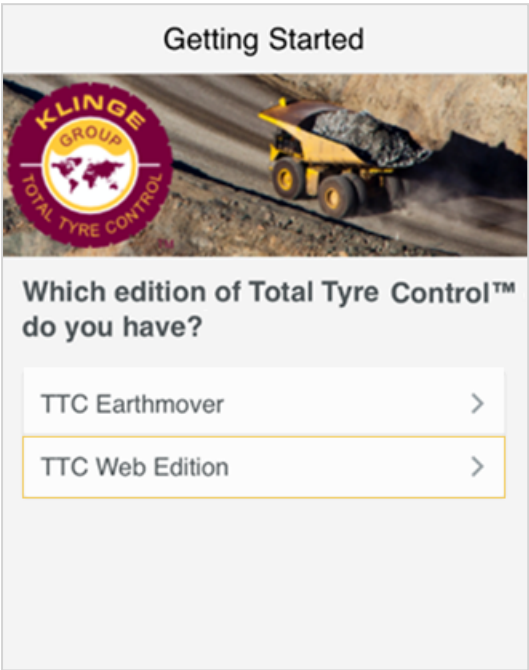

You may have instances where you need to perform tyre surveys but don't have Internet access on location to reach TTC Web. Using the TTC App, you can download site data before leaving your office and use the App to record the surveys offline. Once you have completed the surveys and regained Internet access, the updated data can be transferred to your live site.

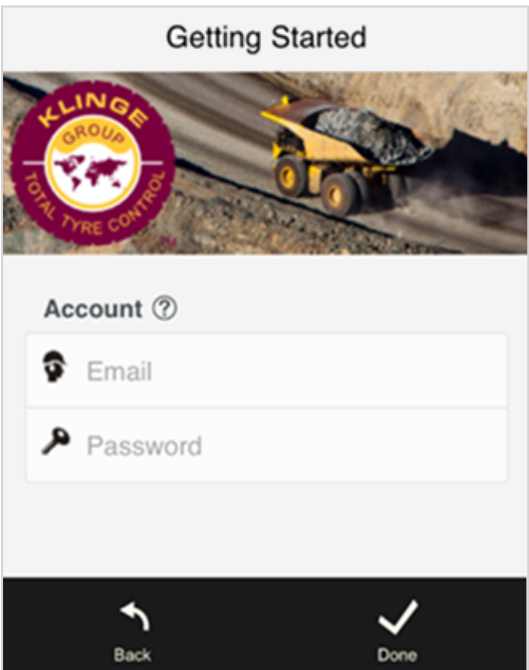

TTC App Setup

When you launch the TTC App for the first time, you will be greeted by a **Getting Started** screen.

Step 1
Tap **TTC Web Edition** to continue to the next step.

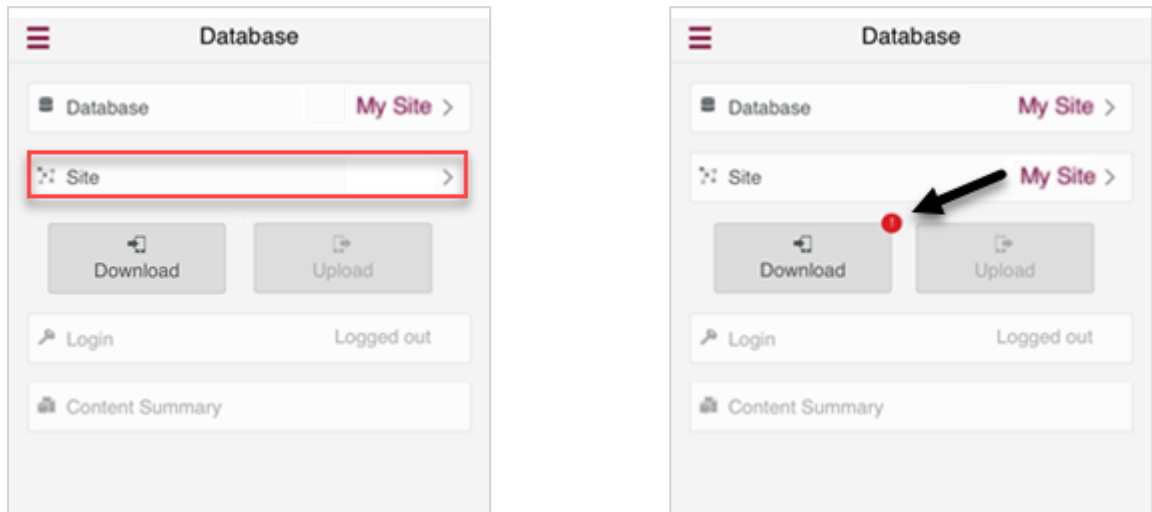

Step 2
Enter the email address and password you use to log in to your TTC Web site.
Tap **Login**.
Once your access is confirmed, you will be able to [download your database](#) as seen on the next page.

TTC App Database

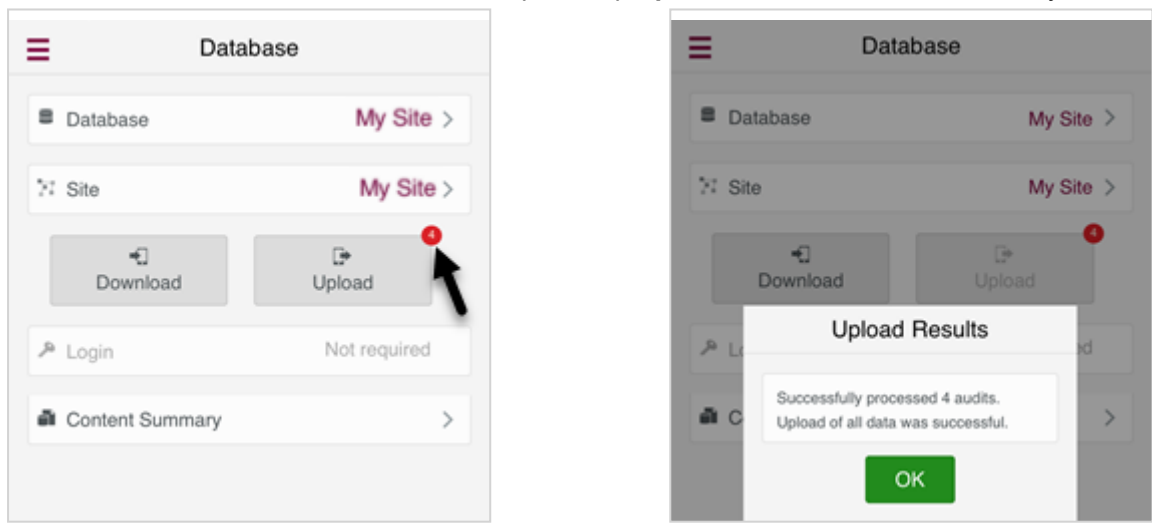

Downloading the database

Once you have signed in and chosen the site you want to collect data for, tap **Download** to transfer the data to your device. Once the data is downloaded, you are ready to go!

Uploading the database

Once audits and maintenance items are complete, tap **Upload** to transfer the data back to your live database.

TTCWebAudits: Processed Vehicle: TTF10-1477

Upload Confirmation
Once the upload is complete, you and the site administrator will receive a confirmation email.

Total Tyre Control® App Menus

The TTC App features an easy to navigate menu system. Browse through the following screen descriptions to learn more.

This is the screen you see when first opening the TTC App. You will find the version number of the app here in the top right hand corner. Home is also where the heart is ♥

The Activities screen is where all the action is. Record and review vehicle audits and maintenance items.

[Learn more about Activities](#)

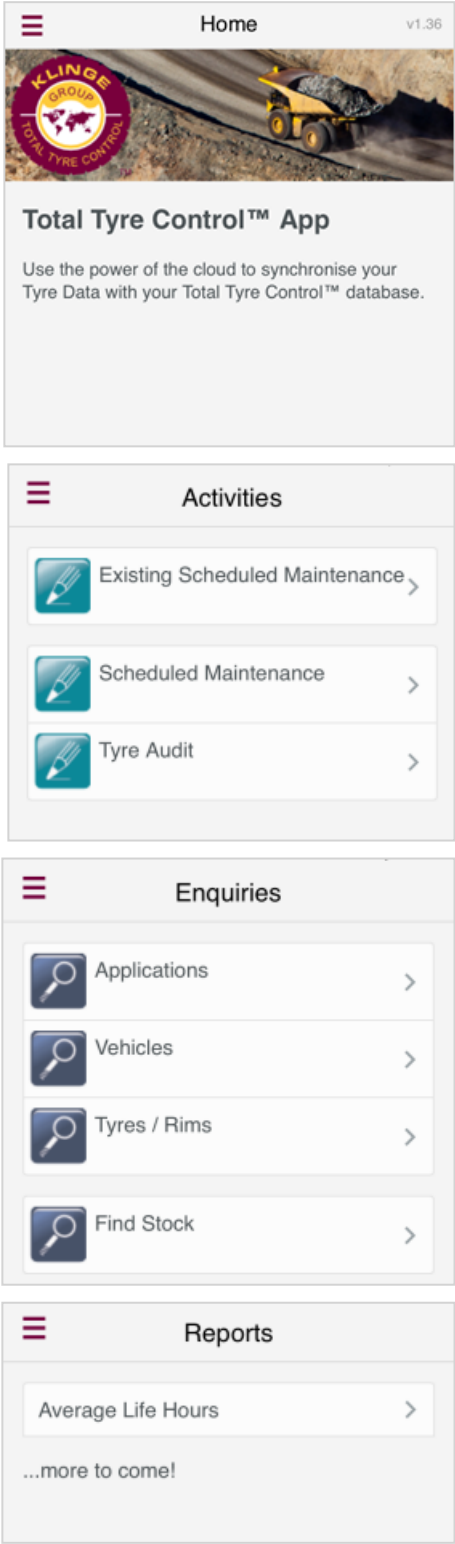

Search and browse applications, vehicles, tyres and rims and drill down for detailed information.

[Learn more about Enquiries](#)

With more reports to come, graphical information on your tyre stock will be at your fingertips.

Database

This screen is where you dictate the traffic flow of the database. You download and upload from here, choose the site data you would like to work with and if required, enter a password. You can also view a summary of the database content.

TTC Mobile Activities

Scheduled Maintenance

Record items found during audits and inspections and set priorities to assist with maintenance planning.

The screenshot shows the 'Maintenance' form in the TTC Mobile App. The form includes fields for Date (6/27/2014 1:06 PM), Vehicle (DZ1960), Wheelparts (Tyres), Priority (Urgent), and Comments (Replace tyre on this position.). Annotations highlight key actions: 'Position 2 selected' points to the second tyre entry, 'Priority chosen' points to the Urgent priority, 'Comment added' points to the comments text area, and 'Tap Save to confirm' points to the Save button at the bottom.

To add an item

- Tap the + icon at the bottom of the screen.
- Set the date of the inspection.
- Select the vehicle.
- Select the tyre/rim that requires attention.
- Choose a Priority.
- Tap the Comments field to type your own comment or select from the predefined list.
- Repeat for next tyre/rim or tap Save.

NOTE: The Predefined comment list can be customised in TTC.

Tyre Audit

Record vehicle clock readings, temperatures, pressures and treads. You can also note or schedule any required maintenance items. You also have the choice of recording:

Treads and Pressures	Treads only	Pressures only
----------------------	-------------	----------------

To add an audit

- Select a vehicle and audit type.
- Select the direction of the audit and position you would like to begin with.
- Ensure Audio Assist and Hands-Free are in the **OFF** position.
- Set the date / time of audit.
- Change the Odometer and Clock readings.
- Select Hot or Cold to indicate pressure reading temp.
- Tap the Position # in the bottom right hand corner to move to the audit screen.

- Tap each row to add or adjust pressures, temperature and treads.
- You can add comments and include them in the scheduled maintenance list.

TTC Mobile Enquiries

Browse your fleet details by application, vehicle or the tyre and rim list. For a filtered search on tyres and rims, choose **Find Stock**.
